

# STUCCO STAR

— Pre-mixed Acrylic Filler —

TSS 8807

## PRODUCT DATA SHEET

### Product Description

**StuccoStar** is a ready-made filler for interior use on most building surfaces, including timber. It provides an even, smooth surface for painting. StuccoStar enables the artisan to patch up and touch up interior surfaces, both old and new, preparing it for painting and fills joints and hairline cracks equally well. StuccoStar is superior to the conventional fillers due its plastic properties, no flaking, and high retention of adhesion and permanence.

StuccoStar bonds extremely well to all common building surfaces including gypsum, gypsum boards, spray plasters, cementitious materials, wood, and galvanized steel laths. StuccoStar is used as a thin coat filler where spray plaster cannot be used. It also goes into patching of hairline cracks in walls, ceilings, repairs of damaged plaster work, paint work, filling of defects, nails holes in woodwork, integrity over lintels and beams, and along the top of skirtings etc.

### Method of Application

**Preparation:** The application surface should not have any foreign matter, dust, dirt or flaking or such surfaces should be cleaned thoroughly and StarBond Penetrating Primer or StarBond Ultra user before patching with StuccoStar. Ridges and form oil must also be removed. Surfaces with encroaching dampness should dampproofed before applying this filler. If dampness is a constant condition, then use of Star Acrylic Filler is advised. Old painted surfaces should be first washed with soda and water solution, rinsed, and dried before filling.

**Application:** Initial application should be a thin even layer; if the area to be repaired requires a thick coat, apply several thin layers. Each layer has to dry before the next layer is added. Within 24 hours of application, sandpaper lightly over the dry final surface before painting.

Tools and equipment should always be cleaned out with water to ensure smooth re-use.

### Health & Safety

Prolonged contact with eyes and skin is not recommended. Always wear protective eye-gear and overalls. Avoid any ingestion. Detailed information is given in the MSDS.

### Packing & Storage

StuccoStar is supplied in 5kg and 20kg plastic pails.

Store in a clean, dry place. Always avoid completely direct sunlight and extremes of heat and cold, especially frost. As long as the containers remain sealed, usage up to 12 months is possible. Always follow first-in-first-out policy.
