

# STARGRIP

— Cementitious bonding agent for smooth concrete surfaces —

TSGP 8812

## PRODUCT DATA SHEET

### Product Description

**StarGrip** is a cementitious hydraulically and organically bound polymer modified key-coat which promotes adhesion of mineral based plastering and rendering systems on smooth concrete substrates and in adverse conditions. Using StarGrip does away with labour and expense surface hacking. Being polymer-enriched and pre-mixed, this compound with prominent mechanical key provides excellent adhesion, aqua resistance, and non-cracking properties.

StarGrip is to be used for providing a prominent mechanical key on smooth concrete surfaces, as a rush coat or key coat, on both walls and ceilings. It can be used on interiors and exteriors. StarGrip is versatile and will go with cement, lime, sand, cement renders, gypsum plaster, machine- and spray plasters.

### Method of Application

**Preparation:** The surface to be treated should be completely devoid of dust, loose particles, dirt, grease, oil, solvents, and paint. Moisten absorbent and porous substrates with water before applying our product. Using a high speed mixer or with a hand agitator mix for 3-5 minutes StarGrip thoroughly with the recommended volume of water. In normal conditions, let the mixture stand for 5 minutes, then stir well and use.

**Application:** StarGrip is to be applied by spraying/flickering machine or handheld brush at a rate of approx 2kg/m<sup>2</sup> to achieve a textured mechanical key. Overnight curing is required before re-applying.

Tools and equipment should always be cleaned out with water to ensure smooth re-use.

### Health & Safety

Prolonged contact with eyes and skin is not recommended. Always wear protective eye-gear and overalls. Detailed information is given in the MSDS.

### Packing & Storage

StarGrip is available in 25kg paper bags.

Store in a clean, dry place. Always avoid completely direct sunlight and extremes of heat and cold. As long as bags are not opened, usage up to six months is possible. Always follow first-in-first-out policy.

## PRODUCT DATA SHEET

### Product Technical Data

<b>Product</b>	StarGrip Adhesive Bonding key coat for smooth concrete
<b>Binder</b>	Hydraulic and organic binders
<b>Fillers</b>	Washed fillers of sand, quartz, and limestone, finely-graded
<b>Consumption rate</b>	Approximately 2-3 kg/m <sup>2</sup>
<b>Colour</b>	Grey
<b>Storage</b>	6 months in original packing
<b>Mixing Ratio</b>	25kg StarGrip: 7 litres Water

*TRIMIX offers a complete range of products for spray plastering and all-surface finishing.*

**Technical Service** is offered by Trimix LLC's Technical Service Department (TSD). A team of Sales/Demonstration Instructors is always available for technical assistance to the Customers on the correct usage of our products. The information given in this leaflet is based on laboratory research as well as extensive field work and application and its present state of knowledge and intended to provide general information on the products and methods of usage. All products are subject to standard conditions of sale which are available on request. Prospective users are advised to determine the suitability of the products and suggestions before adopting them on a commercial scale. Trimix is not liable for any incidental or consequential damages directly or indirectly sustained nor for any loss caused by application of the product(s) not in accordance with instructions or for other than their intended use. Any claim shall be deemed waived unless made in writing to us with 15 days from the date it was or reasonably should have been discovered.
